摘要: 中国传统文化影响的徽州地域, 文教发达, 儒风独茂, 医家辈出。新安儒士对医学领域的涉足, 确保了传统世家医学不仅在临床辨证思维以及医学文化理论研究方面都蕴含了儒文化思想; 同时, 在医德及个人修养上也更高一筹, 亦儒亦医。故文章从“新安王氏医学”以及古徽州地区医学世家已有的医学文化、德行修为所得出的研究成果, 提出了地域文化和世家流传对于新安王氏家族特色文化产生的重要影响, 强调医学家族在医风、医德、医技上的传承以及其在现今教育领域的深层影响, 从而肯定新安王氏家族在新安医学史学及文化史上的特殊地位和贡献。通过本研究丰富完善王氏家族医学文化理论体系, 以期发扬传承王氏特色文化。

Abstract The traditional culture of Huizhou influenced the development of culture and education. The involvement of Xin'an Confucian scholars in the field of medicine ensured that the traditional family medicine not only contained Confucian cultural thoughts in clinical dialectical thinking and theoretical research of medical culture, but also had a higher level in medical ethics and personal cultivation. Therefore, based on the research findings of the medical culture and moral cultivation of "Xin'an Wang's medical school" and ancient Huizhou medical families, this paper puts forward the important influence of regional culture and family transmission on the characteristic culture of Xin'an Wang's family, emphasizes the deep influence of medical family in medical style, medical ethics and medical technology as well as the present education, and affirms the special status and contribution of the Wang family in Xin'an medical history and cultural history. This study enriches and perfects the theoretical system of Wang's medical culture in order to carry forward and inherit Wang's characteristic culture.

Keywords Xin'an Wang's medical school; characteristic culture; family inheritance

中医学流派纷呈, 历史悠久。而中医药文化理论和实践发展在流派的推动下日日蒸上。中医

学的家族特色文化以及家族成员个人医学造诣保障了学术流派的传承, 也是中医学学术的整体和
