Abstract: The prescription of Ganlu Xiaodu Micropills (Sweet Dew Toxin - dispersing Micropills) was created by Ye Tianshi, a TCM practitioner of Qing Dynasty, which originated from *Xuming Yilei'an* (*Extended Medical Cases by Renowned TCM Practitioners*). It is effective in eliminating dampness and resolving turbidity, clearing heat and dispersing toxin. Therefore, it is mainly applied to treat the epidemic of damp - warm syndrome, evil pathogenic factors in the phase of qi as well as equal severity of dampness and heat symptoms. Professor Liu applied Ganlu Xiaodu Micropills to treat various diseases based on the syndrome differentiation and TCM tenets of homotherapy for heteropathy as well as theory of adjusting measures to local conditions, which has been proved effective in clinical practice.
